TRIAL OF FIRE ESGISES .- Several of the fire companies amused themselves Saturday in testing the ers of their apparatus to throw water over the berty-pole opposite Riley's Fith Ward Hotel, in West roadway. Nos. 1, 24 and 48 were brought into operation in the morning. The two first are what are called piano engines, or second class, large size; the latter is what is styled a Carson engine. No. 1 broke some portion of its works soon after getting into operation, and the sport of its members was therefore spoiled. No. 24 worked elegantly; the water from its pipe was thrown over the top of the pole, and the stream maintained that hight as long as the engine was in operation. No. 48 also did remarkably well for an engine of its size and capacity. It threw water up to the vane on the pole. Engine Co. No. 5 were also testing the capacity of their ne, in throwing water up to the steeple of the North Dutch Church, corner of Ann and William-sts. They eeded in throwing a single stream of water more than half way up the steeple.

Harrington, Page, Brown & Co., situate on the extremity of Red Hook Point, were discovered to be on fire, and in consequence of the combustible nature of the building, which was of wood, and the contents, consisting of resis and oil, it burned with great fury, and was entirely enveloped in flames before the Fire Department could reach the spot. About 700 barries of resis, piled up in sheds about the premises, were consumed with the main building. The machinery was also destroyed. Several buildings attached to the factory were award through the exertions of the firemen. No five having been used in the building since the preceding Thursday, it is supposed to have been ignited by an incendiary. The loss is probably about \$10,000, upon which there is an insurance of \$3,500. The office of the Company is at No. 24 Wall-st., New-York.

CARELESSNESS WITH FIRE ARMS.—On Saturday forenoon, a party of boys from 7 to 14 years of age, were annesing themselves by discharging fire arms and flating powder at the corner of Tenth and South Second ats. A geutleman passing on the side-walk between these boys and the fence, narrowly escaped being shot, as one of the boys snapped smusket, which was aimed toward the fence, just as he passed in front of the muzzle of the zun, which missed fire. After he had passed by, the boys discharged the gun, and on returning he found that the gun had been heavily charged with shot. On examining the fence, it was found that these boys had fired several charges of shot into the fence. Alderman Barkee attempted to arrest this boy, but he made his escape. In various parts of the city, your polyse were discharging fire-arms, without molestation from policemen. There are sufficient ways for boys to amuse themselves without using fire-arms. Hereafter, we call typen the police to arrest these young vagabonds who are caught at this kind of amusement, otherwise it will be dangerous to go into the streets on holidays.

Since the announcement of the contents of the Budget
by the Chanceller of the Exchequer, the commerce of
the country has experienced a marked improvement.
The Bullion market has given way since our last, and although some considerable parcels both of Dollar and Bar Silver have been sold, the supply is large, awaiting further orders. Quotations are reduced, and not by any means active. Spanish Dollars are scarce. South American Doubloons in less demand. Gold coming in freely. Money without change, but in good request.

England will show an increase of about £100,000 in the stock of the precious metals. This increase is not so large as had at first been anticipated, owing to some delay in the deposit in the Bank of a portion of the gold lately brought in from Australia, while at the same time the demand for coin for shipment to that quarter has increased.

The London Bank of Australia and India has been announced with a capital of £500,000, and power to increase it to a million sterling. Branches are to be established in the first instance in Sydney, Melbourne, Adelaide and Calcutta.

Shipments of bullion and specie from Belgium to England have lately been taking place. The Ravensbourne brought over from Antwerp £12,000 in bullion
